

Jets Jets

Get More Jet Satisfaction.

High-volume, low-pressure pumps support the exclusive PowerPro jet system in delivering a bold hydromassage. A patented process creates a 50/50 air-to-water mixture that introduces air from all around the jets for a soothing, yet effective, professional-quality massage.

PowerPro® NX2 Jets

Advanced NX2 Jacuzzi Hot Tub Jets effectively relieve tension and strain in the sensitive (and hard-to-reach) neck area with a highly focused stream of water. Change the direction by adjusting the nozzle and intensity of the massage by turning the jet face.

PowerPro® PX Jets

The PX Jets provide a gentle pulsating massage which is perfect for small muscle groups in the wrist and hand. With the introduction of the PX, all the major muscle groups have hot tub jets developed to target specific needs. The strength of the hot tub jet can be adjusted for different rates of flow so you are able to customize the massage to what suits you best.

PowerPro® FX Jets

Jacuzzi Hot Tubs introduced these jets, with their unique directional rifling action that creates a spiral stream of air and water - perfect for stimulating small muscle groups. Fully adjustable for high or low pressure, exclusive PowerPro FX Jets have a rejuvenating effect and can help overworked, overstressed muscles and joints.

PowerPro® FX2S Jets

Patent-pending jets that deliver intense hydrotherapy without moving parts, FX2 Jets are the larger, more powerful version of the original Jacuzzi Hot Tubs FX Jets. Their distinct spiral action produces a surging stream of air and water that provides a vigorous massage to shoulders, back, calves and feet.

PowerPro® IX Jets

Jacuzzi Hot Tubs PowerPro IX Jets create a dramatic stream of light and effervescence. The IX Jet merges maximum airflow with high-output LED lighting, sending multicolored, champagne-like bubbles from the bottom of the hot tub to the surface.

PowerPro® RX Jets

The spinning action of the new patent-pending PowerPro RX hot tub jet is fully adjustable. Simply turn the dial on the face to customize the pressure or turn off the jet action entirely. Modest in size, the RX Jet covers a sizable area, reaching the key muscles and nerves of the back for a pampering hydromassage.

PowerPro® MX2 Jets

Based on the form and function of the original Jacuzzi jet created 50 years ago, the new-generation, patented Jacuzzi Hot Tub MX2 Jets deliver maximum volume at a higher air-to-water ratio. PowerPro MX2 Jets are strategically located to deliver a bold massage, especially effective for muscles in the lower back.
